

Cognitive Performance Examination 38

T.Prousalis - September 2018 ©

Description : CPE38 consists of 38 items (19 verbal analogies, 19 numerical sequences), that have to be answered under no time limit. Test in general requires strict pattern recognition ability; advanced knowledge is not required (only that of elementary procedures (addition, multiplication, subtraction, division) in numerical part and simple information acquiring & processing, when necessary, in verbal part).

Before submitting answers, do read carefully these instructions:

Questionnaire begins here.

Verbal Part

In items 1-19, solve the analogies (Number of dashes (_) denotes the number of characters needed for the answer). An analogy should be read the following way: "arm : leg :: finger : ?" – "Arm is to leg as finger is to (?)". Answer : toe.

Numerical Part

In items 1-19, solve the numerical sequences by finding the number that should replace the question mark. Example : 1, 2, 3, 4, 5, 6, ?. Answer : 7 (Adding 1 each time).
