

## Cognitive Performance Examination - Verbal Analogies

*T.Prousalis - October 2018 ©*

**Description** : CPE-A consists of 38 verbal analogies and is the product of refinement of older tests, as the VRA-F, VRA II and IVRCs, combined with new ideas. Test relies on convergent and divergent verbal processing, as well as pattern recognition ability; required knowledge can be easily acquired through searching the web. Acquiring and managing new information is in some items intended, testing how one may adapt to and process new information. No time limit is set for this questionnaire.
