

# CPE-N Statistics Report

February 2019, hriqtests.com - All rights reserved.

## 1. Histogram

## 2. Statistical parameters

Mean	17,13
Median	18
St. Deviation	7,42
Variance	55,12
SEM (raw)	1,33
Split-half rel.	0,96
Cronbach's $\alpha$	0,93

## 3. Correlation with other tests

Test	N	r	Mean IQ	Mean (CPE-N)
Supervised	17	0,73	137,71	15,59
Supervised*	14	0,89	138,3	13,64
WAIS	7	0,94	136,57	12
RAPM	4	0,88	136	15,75
Jouve	16	0,72	143,13	21,19
C-09	6	0,91	141,67	20
JCTI	5	0,38	144,8	23
RIQ (IQexams)	6	0,91	153,33	21

\* Ceiling scores not included.

#### 4. 1<sup>st</sup> Norm

Raw Score	IQ (sd15)	Raw Score	IQ (sd15)
5	119	22	154
6	121	23	156
7	123	24	158
8	125	25	160
9	127	26	162
10	129	27	164
11	131	28	166
12	133	29	168
13	136	30	170
14	138	31	172
15	140	32	174
16	142	33	176
17	144	34	178
18	146	35	180
19	148	36	184
20	150	37	188
21	152	38	192

#### 5. Comments

Figures are excellent for test's beginning. In addition, an interesting spreading of scores is observed and let us assume test's capacity for thorough and precise assessment.

CPE-N began as a Contest, so the "average testee" seems to be missing. Second norm at 60 submissions will reveal test's properties in a better way.
