

Verbal Reasoning Assessment 50

T. Prousalis - February 2019 ©

Description : VRA50 consists of 25 verbal analogies & 25 verbal associations and is the product of refinement of older tests, as the VRA-F, VRA II and IVRCs, combined with new ideas. Test relies on convergent and divergent verbal processing, as well as pattern recognition ability; required knowledge can be easily acquired through searching the web. Acquiring and managing new information is in some items intended, testing how one may adapt to and process new information. No time limit is set for this questionnaire.

A contest has been set until April 30th; a monetary prize will be awarded to top scorer and free submissions on one or more of my tests to every contestant. Participants will also have the chance to have their score listed in the relevant chart, if they wish so.

Before submitting answers, please do read carefully these instructions: <https://hriqtests.com/instructions/>

Test begins, good luck!
