

## Verba Logica Norm Estimation

Following table is a rough estimation, probably stricter than usual preliminary norms, but still an estimation, as no data exist yet. Further norming will take place as more data is gathered.

| Raw Score | Theoretical IQ (SD=15) |
|-----------|------------------------|
| 1         | 102                    |
| 2         | 108                    |
| 3         | 112                    |
| 4         | 115                    |
| 5         | 117                    |
| 6         | 121                    |
| 7         | 123                    |
| 8         | 125                    |
| 9         | 127                    |
| 10        | 130                    |
| 11        | 132                    |
| 12        | 134                    |
| 13        | 136                    |
| 14        | 139                    |
| 15        | 141                    |
| 16        | 143                    |
| 17        | 146                    |
| 18        | 148                    |
| 19        | 150                    |
| 20        | 152                    |
| 21        | 154                    |
| 22        | 156                    |
| 23        | 158                    |
| 24        | 160                    |
| 25        | 162                    |
| 26        | 164                    |
| 27        | 166                    |
| 28        | 168                    |
| 29        | 171                    |
| 30        | 175                    |
| 31        | 184                    |
| 32        | 190                    |
| 33        | 190+                   |
