

Numerical-Logical Series 33

T.Prousalis - hriqtests.com ©, September 2020

Requirements - Description: The level of required knowledge is low (basic school math skills e.g. multiplication, addition etc.); however, a good sense of observation and pattern recognition skill are needed. Items aren't strictly set in difficulty-based order, but such a pattern may roughly be noticed. Consulting others, presenting and/or discussing items in public or private fora and alike behaviors are strictly prohibited. Respect author's and other people's efforts, be honest with yourself and try this test on your own.

Test begins, please carefully read the [Instructions](#) page before you proceed with sending your answers.
