

SRA Stats & Norm

February 15th, 2021

SRA reached 47 candidates, a sample quite sufficient for providing some useful information and a decent norming approach.

Graph, descriptive figures & correlation table follow; next report will be presented at a total of 60-80 candidates.

1. Graph & fundamental figures

2. Correlation with standard psychometric batteries & other tests

Correlations with standard psychometric batteries & tests by Dr. Jouve, follow. Tests used : WAIS, RAPM, RSPM, RSPM+, GAMA, IST70R Raven's 2, FRT-A, FRT-B ACT, (theoretical score-to-IQ correlation), BADyG-R, Unknown Mensa Entrance Test, C-10, CCAT, JCTI, TRI, IAW, TLAP-R, NVCPE-R.

In addition, category "Spatial" is introduced; correlation with spatial supervised examinations (includes Raven Series (RAPM, RSPM, also newer Raven's 2) and FRTs). Finally, correlation with famous untimed spatial tests is examined, too.

Test	Pairs (Range)	Rho	MeanRaw	MeanIQ
Total*	36 (114-170)	0,72	19,64	143,81
Supervised	25 (114-164)	0,7	19,48	138,8
Supervised*	22 (114-164)	0,72	19,27	138,95
Spatial	9 (134-160)	0,82	18,67	140
WAIS	8 (114-164)	0,79	19,38	135,5
Jouve	14 (136-170)	0,88	20,21	151,43
JCTI & TRI	8 (139-158)	0,72	19,38	149
LS36 (R. Lato)	7 (131,1-163,1)	0,53	19,43	147,17
SLSE48 (J. Wai)	4 (132-177)	0,93	21	155

IQ provided by SLSE48 was recalculated (M=100,SD=15). Norm follows in the next page.

3. SRA Norm

Norm follows, according to aforementioned correlations. RS: Raw score on SRA (x/36), TIQ: Theoretical IQ attributed to raw score points achieved (M=100, SD=15).

RS	TIQ	RS	TIQ
9	112	20	146
10	119	21	149
11	122	22	154
12	125	23	157
13	128	24	160
14	130	25	163
15	132	26	167
16	134	27	171
17	135	28	173
18	138	29	175
19	142	30	175+
