

Verba Logica Preliminary Stats & Norm

February 2021

Verba Logica reached 16 candidates; however, due to sufficient incoming data, a decent norming approach was made possible.

Graph, descriptive figures & correlation table follow; next, detailed, report will be presented at a total of 40-50 candidates.

Correlations with standard psychometric batteries & tests by Dr. Jouve, follow. Tests used : WAIS, RAPM, Raven's 2, FRT-A, ACT, GRE (their theoretical score-to-IQ correlation), BADyG-R, C-09, C-10, C-12, CCAT, JCCES, JCTI, TRI, CSE, IAW, TLAP-R.

Test	Pairs (Range)	Rho	MeanRaw	MeanIQ
Total	36 (126-170)	0,73	19,64	144,86
Supervised	17 (129-164)	0,82	20,24	144,12
WAIS	7 (129-164)	0,91	20,43	141,14
Jouve	19 (126-170)	0,7	19,11	145,53
CCAT/JCCES	5 (127-170)	0,87	20,6	147,6

Norm follows, according to aforementioned correlations. RS: Raw score on Verba Logica (x/33), TIQ: Theoretical IQ attributed to raw score points achieved (M=100, SD=15).

RS	TIQ	RS	TIQ
14	127	21	152
15	130	22	158
16	131	23	161
17	133	24	164
18	138	25	167
19	143	26	169
20	147	27	<i>>=172</i>
